

A Vision for How Chemical Vendors will Participate in the Mill of the Future

Marty Hoskins

NA Marketing Manager – Pulp

PAPTAC Bleaching Committee Meeting – Spring 2020

I don't want a
Mill of the Future

Future's coming
whether you like
it or not

Agenda

Think

“Innovation is the ability to see change as an opportunity – not a threat”

~ Steve Jobs

It is coming!!

It will have its challenges!

Goals

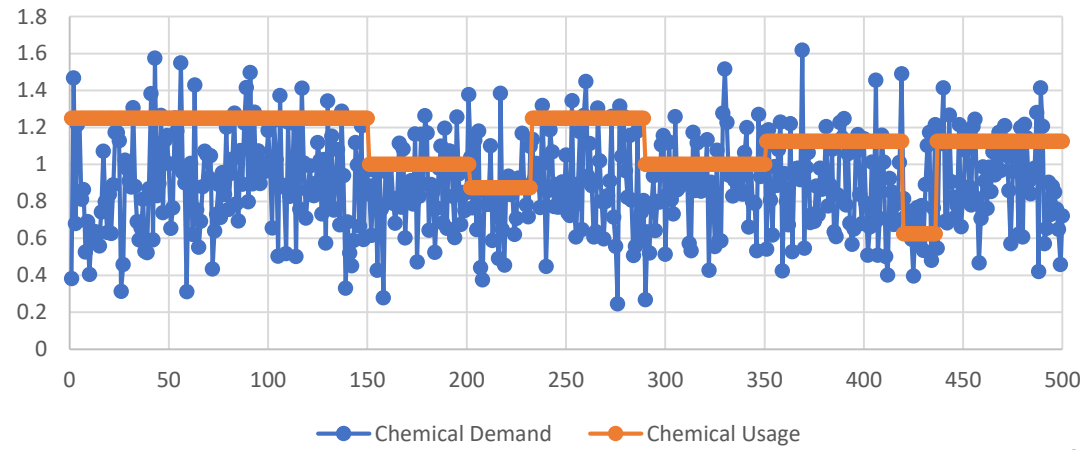

Become a
participant
and not a
spectator

Bring value
to this
inevitable
process

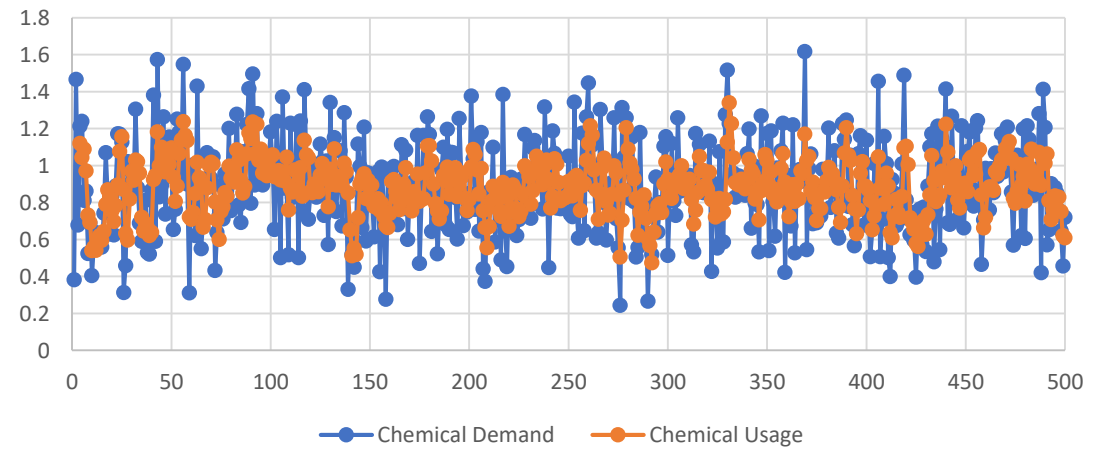

Make our
customers
even
better

Focus

Chemical Usage vs Chemical Demand
Operator Control

Chemical Usage vs Chemical Demand
Mill of the Future

Not less chemistry or more
chemistry, but.....

The chemistry that the process
demands given current
conditions!

Why?

So how will chemical vendors participate in “The Mill of the Future”?

Innovate!!

We must Innovate outside of the development of new molecules!

What will it look like?

It will focus on
chemical demand

It will
communicate

It will be
process based

It will be a
component

It will bring
value

Thank you!!

Be Safe!!
